MEDUSA

i-Waterproof Additive

According to ancient wisdom, to reach the effect for waterproofing, the ancestors mixed with glutinous rice water, mud and sand to solve the problem, according to this concept, Hua Tsai Meduda uses plant extract technique to innovate nature, non-toxic, stable liquid type waterproof formula. This patent technique can strong your building structure, to avoid efflorescence, leaking of the window, wall mold etc.

We are the expert for healthcare and prevention in building! Hua Tsai Meudsa is specialized in waterborne imitating stone paint and full series of inorganic waterproofing material. All of our material is formaldehyde-free, non-toxic and eco-friendly. Compare with traditional constructing procedure, we can save more than 50% of time and works, which can offer you best solution on lacking workers issue.
