

HUA TSAI

PAINTS

Taiwan HUA TSAI Medusa paints

Its Texture Is Exquisite With Nature Grain.

Main application: Exterior or interior wall for building and different shape molding.

Spray on the wall, which is unlimited by the shape for building.

■ **Imitate as real**

■ **Lightweight**

■ **Always look as new**

■ **Easy to repair**

Hua Tsai Paints Co., LTD who is specialized in waterborne imitating stone paint and full series of inorganic waterproofing material. All of our material is formaldehyde-free, non-toxic and eco-friendly. Compare with traditional constructing procedure, we can save more than 50% of time and works, make your building structure's life longer.

Environmental protection is Hua Tsai's core concept, so we develop imitating stone paint to take place of real one, therefore we can avoid to over develop and destruct the nature, to reach sustainable development.

Imitating stone paint can be applied on any shape and any material, it is not be limited.

We have expert RD team and full experience service team to offer you one shop service, also we can customize the product which can reach over 95% of similarity according to your demand.

With the base of Integrity, responsibility and creativity, Hua Tsai Paints Co. Ltd. can offer various, beauty and healthy life aesthetics.

Our main market is Taiwan, Indonesia, Vietnam, Thailand, Philippine and China, Hua Tsai Paints Medusa is well-known brand and official building & constructing company's outfitters. We hope to offer safe, non-toxic living surrounding to people all around the world.

MEDUSA

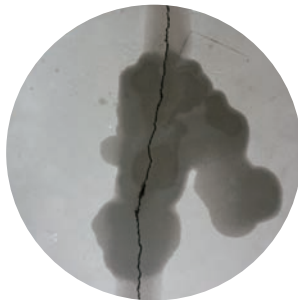

i-Waterproof Additive

According to ancient wisdom, to reach the effect for waterproofing, the ancestors mixed with glutinous rice water, mud and sand to solve the problem, according to this concept, Hua Tsai Meduda uses plant extract technique to innovate nature, non-toxic, stable liquid type waterproof formula. This patent technique can strong your building structure, to avoid efflorescence, leaking of the window, wall mold etc.

We are the expert for healthcare and prevention in building! Hua Tsai Meudsa is specialized in waterborne imitating stone paint and full series of inorganic waterproofing material. All of our material is formaldehyde-free, non-toxic and eco-friendly. Compare with traditional constructing procedure, we can save more than 50% of time and works, which can offer you best solution on lacking workers issue.

Inorganic Waterproofing & Heat Insulation Crystal Material

This is waterborne mineral material, its thermal conductivity coefficient is low, which is high efficient waterproofing and weather resistance insulation material. Easy to use, you can directly spray or apply on the wall. Compare with traditional roof waterproofing, Inorganic Waterproofing & Heat Insulation Crystal Material has better elasticity and easily to repair, also can save time and cost.

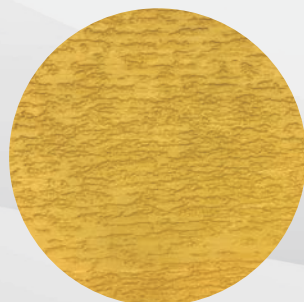

Mainly applied area: roof top, exterior wall.

One procedure, waterproofing & heat insulation are done.

Compare with traditional building, the temperature can be cooling down to 16 ° C, which can realize energy saving, environmental friendly.

Multi colors can choose, use different tools to apply, you can make your unique

■ Super heat insulation ■ Effective cooling
